Profile

Detail-oriented Software Engineer specializing in backend development using **Go**, **JavaScript** and **PostgreSQL**. Experienced in building **RESTful APIs**, CLI tools, and scalable architectures. Solid foundation in **DSA**, **OOP**, and **operating systems** with a track record of **300+** coding problems solved on **LeetCode** and **Codeforces**.

Skills

Programming: **Golang**, C/C++, **JavaScript**, Python

Databases: MongoDB, MySQL, **PostgreSQL**

Web: **React**, TailwindCSS, Node.js, Express.js

Concepts: DSA, **OOPs**, OS, **Git/GitHub**, Postman

Projects

04/2025 – Present

Bookstore API

Developed a Book Management System using **Go** and **MySQL**, implementing full CRUD operations with GORM and Gorilla Mux. Focused on **clean API** design, modular project structure, and real-world database interaction using ORM.

04/2025 – Present

CheckMail

Developed a Go-based **CLI** tool that validates domain **DNS** configurations by checking for **MX**, **SPF**, and **DMARC** records. Designed for quick diagnostics of email readiness and security policies.

07/2025 – Present

File Organizer

A simple and efficient **CLI application** written in Go to automatically **organize** files in a directory based on their file types (extensions). Ideal for cleaning up your messy Downloads or Desktop folder with a single command.

Education

09/2020 – 10/2024

Bachelor of Science in Computer Science and Engineering

Chittagong, Bangladesh

Premier University, Chittagong

Professional Experience
